

Controls and compliance checklist

This project involved conducting a security audit for Botium Toys by reviewing its security controls and compliance checklist. The objective was to determine whether existing controls were sufficient, identify areas that required improvement, and provide recommendations to strengthen the organization's security posture and regulatory compliance.

After conducting a security controls and compliance assessment for Botium Toys, I found that the organization has implemented several important safeguards, including firewall protection, antivirus software, physical security controls, CCTV surveillance, and fire prevention systems. While the assessment identified opportunities for improvement in access controls, disaster recovery planning, encryption, password management, and regulatory compliance, the organization demonstrated a commitment to addressing these gaps and strengthening its overall security posture. I recommend that Botium Toys continue implementing the proposed security enhancements to reduce risk, improve compliance, and better protect its systems, assets, and customer data.
